

Our Pursuit of Excellence

We are the management team at Aurora Las Encinas Hospital.

We are responsible for the daily operations of our facility, which has proudly served the community since 1904.

Together with our Medical Staff, we are committed to providing the safest, highest quality of care to our patients and family members.

Our goal is to help our patients improve the quality of their lives and recover to the fullest extent possible from the problems that led to their hospitalization.

Our patients trust the expertise of our dedicated doctors and the caring staff members who help them in their recovery efforts.

We are proud to work at a hospital that has helped thousands of patients recover from substance abuse and mental illness.

We are proud of the excellent care provided by the physicians, psychologists, nurses, social workers, case managers, mental health workers and other professional staff we work with every day.

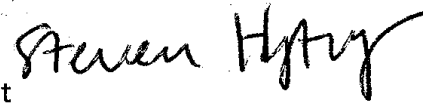

We are proud to be accredited and licensed by organizations such as the Joint Commission, the Centers for Medicaid and Medicare Services, the California Department of Public Health, and the California Dept of Alcohol and Drug Programs.

We pledge to make sure we continue to provide the highest quality of care to our patients.
